

**PROFESSIONAL STRENGTH**

**Engines demand MORE.™**

**BG MOA.®  
Run stronger.  
Drive longer.™**

## **What engines want**

Modern engines are smaller, fine-tuned, high-performance marvels that run at significantly high operating temperatures. Long idling, stop-and-go traffic and heavy loads put stress on the oil and deplete protective additives.

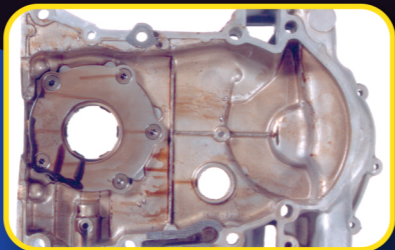

When additives deplete, sludge and varnish accumulate, which can cause premature wear.

BG MOA® gives engine oil a boost with sludge inhibitors and friction fighters for extended engine life.

*continued on back*

## TIMING GEAR COVER

BG MOA® prevented oil oxidation and kept this engine clean throughout a *triple-length*, 240-hour Sequence IIF engine test.

## What will BG MOA® do for you?

Used with each oil change at recommended drain intervals, BG MOA® will provide:

- Clean engine components & deposit control
- Protection against engine wear
- Protection against corrosion
- Greater power & performance
- Reduced emissions
- Reduced oil consumption
- Longer engine life

*If your engine demands these features, demand BG MOA® with your next oil change along with BG EPR™ Engine Performance Restoration, PN 109, to quickly and easily remove fuel gums that clog piston rings.*

**BG MOA.®**  
**Run stronger.**  
**Drive longer.™**
