BG Battery Service

Stop Losing Battery Life!

Ask your Service Advisor
for a BG Battery Service.

BG Battery Service protects your battery's service life from corrosion.

The electrical charge in battery posts creates corrosion over time. That corrosion creates a conduit for power to drain from the battery continuously, even when the vehicle is not running. BG Battery Service removes all corrosion and insulates the charge of battery posts from the battery case to inhibit corrosive buildup.

Battery terminal with corrosion buildup.

Battery terminal after BG Battery Service.

BG Battery Service should be performed every year to maintain dependable starting and longer battery life.

Ask your Service Advisor for a BG Battery Service.
